

## ..Wincollect Enterprise.net

### Key features at a glance

- **Microsoft's SQL database** - to store and work with your data to provide fast and efficient data processing and to deliver scalability and reliability for mission critical environments.
- **Feature Rich .Net Application** - easy to use completely new collector interface via the .Net 2.0 Framework.
- **Customizable Interface** - Data fields can be changed to present the field descriptions according to the individual needs of each client.
- **Automated Account Alerts** - Automated prompts for accounts such as Out of State and Disputes highlight account issues.
- **Client Requests** - specific management facility for handling client requests is built into the collector interface.
- **Collector Statistics** - are available to the collector with the click of a button.
- **Auto Response** - now available through a smart user friendly drop down list.
- **Predictive Dialing** - linked directly to the database for real time interactivity.
